## Introduction

The ADAM-3600-C is an intelligent Remote Terminal Unit with wireless function, multiple I/O selection, wide temperature range and support flexible communication protocol for oil, Gas and Water application. With the ADAM-3600 in your system, you can get more intelligent monitoring and management result. The ADAM-3600-C is powered by pbs SoftLogic Runtime kernel with Modbus, DNP3, IEC870-5-101/103/104 and S7-Connect client protocols.

## Features

### Wide Array of Flexible I/Os

Wide array of on-board I/O and flexible expansion I/O modules supporting different acquisition requirements giving it a high cost performance.

### Wireless Communication & Protocols

The ADAM-3600 simultaneously supports two mini-PCIe cards (a half-size and a full-size) for Wi-Fi/ 3G/ GPRS/ Zigbee communication which is flexible for wiring in the field. Modbus RTU/TCP and DNP3 protocol support that integrates the ADAM-3600 with more SCADA systems. The ADAM-3600 also supports IEC870-5-101/103/104 and S7-Connect client protocols.

### Wide Temperature Range

A -40~70°C operating temperature allows the ADAM-3600 to work in harsh environments and reduces the maintenance costs for customers.

### Remote Firmware Update

The ADAM-3600 can use a USB drive and an SD card to automatically update the firmware so there's no need to bring a computer and execute the configuration program in the field.

### Intelligent Connectivity Diagnosis Manager (iCD Manager)

Remotely monitor the serial and Ethernet ports status and send the alarm information, during the communication failure, to improve the intelligent monitoring.

### Node ID for Batch Configuration

Each ADAM-3600 has a node ID as its name to support batch configuration (max.64) with the configuration utility. When an alarm is displayed on the utility, customers can directly find the fault source with the node ID.
